

Performance Edge Solutions

Performance Edge Solutions gives you the edge you need most – with your people. Founded by Dr. Tom Brunner, Performance Edge Solutions is a private consulting firm and leader in using Great People Science (GPS) to identify and improve personnel factors that have deep financial implications for your future. No matter how large or small your business we flexibly apply GPS in a scalable and highly cost effective manner providing high yield results.

Organizations most often fail not because of technical issues, but because they did not cultivate a productive and accountable culture composed of exceptional professionals. To attract, develop, and retain exceptional people/cultures, you need a toolbox of credible techniques that reveal the critical but often hidden factors tied to your next growth challenge.

We help you conquer your growth challenges by solving key personnel issues. Why make deep investments (e.g., hiring, merging, and succession) with shallow information?

Talent Development & Retention

How does our expertise serve your needs?

- Over three decades of combined experience in fully harvesting high potential personnel so they are fully prepared for leadership roles.
- Seasoned experience helping organizations identify hidden needs of top talent leading to fast-tracking, heightened productivity, and much higher retention rates.
- Specialized expertise in assessing and developing “intangible” qualities such as Emotional Intelligence (EI) that help managers and high potential talent become transformational leaders.
- Comprehensive but concise behavioral science tools ensure highly talented personnel accelerate strengths and fill in skill gaps quickly.

Our GPS toolbox is fully customized to your needs and contains four unique benefits:

Predictive Power:

Our tools quickly give you comprehensive but concise and actionable information so you make more confident and reliable decisions.

Deeper Awareness:

We give you the “deepest intelligence” with tools that penetrate far beyond the superficial information gathered from narrow methods like interviews, resumes and amateur or generic surveys.

Precise Guidance:

Our first commitment is to understand your reality more deeply than anyone else has. We get to the root of your problems to solve your growth challenges.

Sustainable Results:

We provide long-term solutions that anticipate future challenges so our present solution is future focused.
